TrayMemo Crack X64

TrayMemo For Windows 10 Crack is a small Windows application whose sole purpose is to help you keep track of multiple notes at the same time. Unobtrusive running mode TrayMemo runs quietly in the system tray without interfering with your work. In order to access the program's features you are required to perform a right-click mouse operation on its icon from the system tray. The tool was designed with an overall simplicity in mind so the main panel is quite minimalistic. Hotkeys TrayMemo offers support for preset hotkeys for helping you trigger various actions, such as reveal or conceal the notes, create a new note, open the exiting file, close the current tab, save data, and jump to the next or previous tab. You can view the keyboard shortcuts displayed in a dedicated panel and reassign only the one used for showing or hiding the notes. How it works TrayMemo gives you the possibility to create a new note by uploading the information from plain text file format. You may generate multiple notes and easily switch between them thanks to the multi-tabbed layout. What's more, the application offers support for text editing options, so you can easily alter the text revealed in the main window and delete unnecessary data. When you close a note, the tool asks you if you want to save the changes applied to it or not. Performance TrayMemo carries out a task quickly and without errors. It leaves a minimal footprint on system resources, so the overall performance of the computer is not affected. Bottom line TrayMemo delivers basic functions for helping you create and manage your notes. However, it needs a different approach and support for advanced features in order to compete with other powerful applications from its category. It would have been useful to see support for user-defined hotkeys, note creation from scratch, custom groups, and text customization options, just to name a few suggestions. Lets talk about the advantages of our app: Your task: just select the text you need to record on your program Superfast and reliable: We prioritize the stability and efficiency of our program. Increasing your phone performances: We optimize the speed of our program in the background, so your device will work much more smoothly. Lets talk about the disadvantages of our app: Need for Support: We are a team of only 5 people, but this doesn't mean that we cannot provide support for you in case of any questions.
