G. RULES TO APPLY . If any of the quality statements have been failed, the student is put into a specific program that will handle the situation to determine the cause of a failed quality statement. . DESIGNERS - MANUFACTURING Engineering Drawingâ€³3/16â€³0. 0.000803â€³0.02008% 0.02008% 0.02008% 0.02008% 0.02008% 0.02008% 0.02008% 0.02008% 0.02008% 0.02008% 0.02008%Q: Handling with PouchDB when the collection is renamed I'm developing an app and I'm storing data with PouchDB. I have two collections named projects and orders. Everything works fine, but I'm facing a challenge. When I rename a collection, the new name isn't recognized and the old collection is used instead. Is there any workaround to this problem? Any help would be appreciated. Thanks A: When you add a document to a specific database, PouchDB will use the actual database path to look for the db, not the name of the database. The name is only used when you look for the db documents on the server, but the client will not change the collection name without a server side option. You can however look at the name of the document to see what database it belongs to. I think if you update the db path it will update the naming and the documents will work as they should. var db = new PouchDB('Applications/PouchDB/databases/mydb'); db.post('/orders', { name: 'foo' }); console.log(db.name); // "mydb" Department of Energy (South Korea) The Department of Energy (Korean: 에너지부; Hanja: 能源部) is a government department of South Korea. It was established on July 15, 2005. The department has jurisdiction over energy, including generation, distribution, storage, conservation, and use of energy. The division also administers the energy related budgets. The current head of the department is Yoo Soon Kwe 648931e174
