VirtuaCreature is the ultimate monster RPG influenced by the creature-craze of the past. You'll be responsible for all facets of your creature, and the effort you put in will reflect in how it grows. From baby to beast - it's in your hands! Everything you do influences the development and evolution of your monster. How you raise it and what it's fed will completely alter the look and abilities it obtains as it grows! Test your mettle against many opponents! Compete in Arenas to learn the ropes and put your creature's stats to the test! Pick a stance and engage in rapidly paced battles! Memorize the different types to gain an advantage! Different arena types for each tier of evolution! Multiple difficulties for each type! "Infinite" arena with increasing scaled difficulty and rewards. How long can you last? "Impossible" arena with max-level creatures to face off against! "Max" arena to test a hypothetical maxed-out creature! Compete in Towers, turn-based RPG battles where all your knowledge and skills will be vital to winning! Utilize a complex and powerful stat system that allows you to customize and create builds for your creatures to fit different playstyles. Optimize and find your best match! Play multiple unique minigames to discipline your creature! Whether it's an endless-runner Race or the arcadey Smack-A-Mole, your monster will take from your interactions! Purchase and combine ingredients to make various different stat-changing items. Keep track with an in-game recipe book, and craft accordingly to your needs! Make your creature even stronger through special equipment, obtainable through chests - And no, that doesn't mean paid lootboxes. Each piece of equipment has a different type, power level and color, so you'll have to match it best to your beast! Clear timer-based nodes in the Void Mine to obtain chests, money or Synths, a special item that can be used to level up your equipment to be even stronger! As you clear nodes, your "Drill Level" will increase, giving you access to better loot pools than before! As your creature evolves, the complexity of the art increases exponentially - Go from simple 8-bit blob to a fantastical steampunk camel, a rhino layered in Aztec patterns, or an icy crocodile that freezes water around it. With over 20 unique designs, your play-through

Trick and Treat is a 2d remake of the original flash game made by Triplehorn, published in 2015. It was a surprise hit thanks to its cute and simple gameplay, lovely pixel art and chiptune soundtrack. It has a very simple story, but it does not get boring, and you will eventually enjoy it! There is no dialogue, nor instructions, just the cute chiptune soundtrack, and your job is to get the candy for the baby sweets. The original game is downloadable for free from this site. Have fun ^_^ X ------------------------ Thank you very much for the support! ------------------------ "Treat", "Trick", "Trick & Treat" and "Trick'n'Treat" are registered trademarks of Irem Corporation.This invention relates to a method for fabricating a gradient-index glass rod for optical waveguide. A communication technique using optical fibers as a transmission line has been under development in recent years. At present, single mode optical fiber is widely used for a long distance communication due to low loss and high efficiency. However, since the single mode optical fiber has a diameter of around 9.mu.m, it is impossible to fabricate fibers with a diameter of less than 5.mu.m even by the current technology. To overcome this, an optical fiber with a very small core diameter (around 5.mu.m) is needed. To this end, a refractive index distribution such that the refractive index at the center becomes higher than those in the vicinity of the center is employed. This refractive index distribution is called a gradient-index (GRIN) lens, and is fabricated by preparing a glass rod containing germanium dioxide as its main component and adjusting the composition of the rod so that the refractive index of the core and cladding may become different. The technique for fabricating such a glass rod is disclosed, for example, in the Japanese Patent Unexamined Publication No. 61-214431. The conventional technique for fabricating GRIN lens comprises the steps of sintering a glass rod prepared by a float method or a Czochralski method to form a spherical glass rod, drawing the rod to form a linear or rod-shaped glass rod, and then polishing the rod. In this step, it is important that the crystallization of the glass is prevented so that the resultant rod can maintain its curved shape. If the crystallization occurs, c9d1549cdd

What's new:

District, Fujian Shanhe District () is a city district (district) of Zhangzhou, a prefecture-level city in Guangdong province, China, bordering Fujian province to the north. During the Ming dynasty, the city of Zhangzhou was known as Jingde (). It is one of the oldest and most important cities on the middle reaches of the Min River (Slavonic: Yugra), on the trade route from the capital Nanjing to the port of Jiangmen. History Ming dynasty In 1631, in the late Ming dynasty, the city of Zhangzhou went through a disaster. Due to war, enough foodgrain to feed the people was insufficient. When the Northern Ming Empire collapsed, hundreds of thousands of people starved to death. 1683–1684 Silk Road massacre Zhangzhou was sacked by the Qing dynasty in 1683, but was able to regroup and fought back the Qing dynasty during the 1683–1684 Silk Road massacre. Modern era It was part of the Nan'an and Longhu Factories during the Qing dynasty. In 1907, the Eight-Nation Alliance troops led by occupied and set fire to the Longhu Factories. Zhangzhou was subsequently claimed by the government of the Republic of China as one of the cities belonging to the Province of Jiangnan since 1928. In 1953, during the Great Leap Forward, a small-scale nationalization, about 360,000 people were forced to move to rural areas, including about one fifth of the local Han people. In 1959, Zhangzhou got its first high school. In the 1980s, public education was stepped up by the government. In 1985, Zhangzhou won its first gold prize in the Zhongguo Shehui Kexue Bowuguan (Chinese Society for Social Sciences) Essay Campaign over "A Study of the Commercial Sectors in the Qing and Ching Provinces Regarding Trade Goods" (中国社会科学博物馆). In 1992, the famous Yuehua crater in Yanan County, Zhangzhou was discovered. It became an important tourist attraction. It was regarded as one of the significant local environments among China. In 1999, Zhangzhou was upgraded to a prefecture-level city. Geography Shanhe District is currently the most important city
