Friends, Admirers, Fans.The present invention relates to a baking utensil for stacking cookies or other baked goods for maintaining their freshness and/or preventing them from drying out. Baking dishes are used to hold and bake food items such as breads and cakes. However, these are of a flat design that limits the amount of food that can be placed therein. Referring to FIG. 1, bakery items 10, such as breads or cakes, are placed on a baking dish 12 for baking. The baking dish is sometimes placed onto a wire rack 14 that is mounted on a baking or roasting pan 16. The wire rack is often made of stainless steel or wood that is more expensive than the baking pan. These materials present a problem because they stick or slip when 6d1f23a050
