The material may be, for example, a liquid, a resin, a lacquer, an adhesive, a sealant or any of the other various materials that may be used for this purpose. One specific application where such a material is used is in a disposable diaper or incontinence undergarment which is constructed so that, upon use, there is a need to peel the material from the target. Such disposable diapers or incontinence undergarments have an outer covering in the form of a relatively thin flexible material, such as a nonwoven material made from c6a93da74d
