Star Trek Armada 2 ISO And Fleet Operations Mod Crack

after a long period of conflict, the system seems to be at a stalemate. large krayt warships and other vessels are present in multiple star systems, but the major powers have taken their fighting elsewhere. many smaller factions have joined the battle though, and the federation has lost a large ship. several fleets from the federation are trapped in the mos eisley sector. the planet is trapped by the same force field the imperial fleet was trapped in a long time ago. the field surrounds the planet with a barrier that makes their ships inactive. a large planetary defense force has been built on the planet and is now the target of several hatt, remata, and republic fleets. join the battle with 3 unique campaigns, consisting of 9 missions per campaign. play solo, or fight against your friends in the multiplayer mode. new features, including free mission downloads, user created missions and custom deathmatch maps. update: 19.02.2016. my experience is only with the pc versions, but according to the site, it is with mac too. it takes a long time to start up, and the screen turns black at the end of the intro movie. i think that is the only issue with this version. however, i assume it is worth trying since it's all over the internet and seemingly working for others. update 2: 19.02.2016. i found out that the black screen problem is caused by one of the graphics settings. to get rid of the black screen problem, go to steam control panel's settings and go to "video settings" then go to the "display" tab. then set the "use flat-rate encoding" to false and it will work as it should. 5ec8ef588b
