# How to Use FileMaker Pro Advanced 12.0.1 Portable to Create Custom Apps

FileMaker Pro Advanced is a powerful and easy-to-use tool for creating custom apps that work seamlessly across Windows, Mac, iPad, iPhone, and the web. With FileMaker Pro Advanced, you can design and develop apps faster, troubleshoot more efficiently, and enhance your app with advanced features and scripting capabilities. But what if you want to use FileMaker Pro Advanced on different computers without installing it? Or what if you want to share your app with others without requiring them to install FileMaker Pro Advanced? That's where FileMaker Pro Advanced 12.0.1 Portable comes in handy. FileMaker Pro Advanced 12.0.1 Portable is a version of FileMaker Pro Advanced that can run from a USB flash drive or an external hard drive. It does not require installation or activation, and it does not leave any traces on the host computer. You can use it to create, modify, and run your custom apps anywhere you go. In this article, we will show you how to use FileMaker Pro Advanced 12.0.1 Portable to create custom apps that suit your needs and preferences. We will cover the following topics:

- How to download and run FileMaker Pro Advanced 12.0.1 Portable
- How to create a new app or open an existing app with FileMaker Pro Advanced 12.0.1 Portable
- How to use the layout tools and themes to design your app's user interface
- How to use the field options and calculations to define your app's data structure
- How to use the script workspace and debugger to add logic and functionality to your app
- How to use the security tools and encryption to protect your app and its data
- How to use the sharing options and web publishing to distribute your app to others

By the end of this article, you will have a better understanding of how to use FileMaker Pro Advanced 12.0.1 Portable to create custom apps that can run on any Windows computer without installation.

## How to download and run FileMaker Pro Advanced 12.0.1 Portable

To download FileMaker Pro Advanced 12.0.1 Portable, you need to have a valid license of FileMaker Pro Advanced 12.0.1 or higher. You can purchase a license from the official website or use an existing one if you have it. Once you have a license, you can download the portable version from this link: <https://www.filemaker.com/support/downloads/portable.html>. You will need to enter your license key and email address to access the download page. After downloading the portable version, you need to extract it to a USB flash drive or an external hard drive with at least 1 GB of free space. You can use any file compression software to extract the files, such as WinRAR or 7-Zip. To run FileMaker Pro Advanced 12.0.1 Portable, you need to plug the USB flash drive or the external hard drive into a Windows computer that meets the minimum system requirements for FileMaker Pro Advanced 12.0.1. You can find the system requirements here: <https://www.filemaker.com/products/filemaker-pro-advanced/12/specifications.html>. Then, you need to open the folder where you extracted the portable version and double-click on the file named "FileMaker Pro Advanced.exe". This will launch FileMaker Pro Advanced 12.0.1 Portable without installing or activating it on the host computer.
